Planning organization talks long-term rural transportation plans

By [Craig Kelly](#) · September 30, 2024

The West Central Ohio Rural Planning Organization held an open house Monday at the Ohio Department of Transportation District 1 office in Lima to show some of its long-term rural transportation plans for the region, including Auglaize and Putnam counties.

Craig Kelly | The Lima News

LIMA — When it comes to the changing landscape of rural transportation, engineers and civic planners are widening their scope, both in their future planning and, in some cases, even in the width of the roadways themselves.

The West Central Ohio Rural Planning Organization held an open house Monday at the Ohio Department of Transportation District 1 office in Lima, giving the public the opportunity to see what transportation-related projects have been proposed for the future and what the general vision is for rural transportation not just in the short term, but over decades.

"This long-range plan we've put together is a 20-year outlook," WORPO manager and senior planner Colleen Barry said. "In the end, if it is accepted, the government will designate these areas as an RTPO, and being a member of a transportation planning organization will give some of these counties access to funding."

The counties involved in this process are Auglaize, Hancock, Mercer, Putnam, Van Wert and Wyandot counties, and having this collaborative approach through WORPO will help each of them not only get a clearer sense of how to address their own rural transportation needs but it will also help show opportunities for collaboration across county lines, according to Barry.

"This is the generalized framework that helps integrate them into more regional goals," she said. "At the same time, there are specific plan projects for active transportation, sidewalks and bike paths that they want to see happen within communities."

One common thread Barry has seen across county lines involves widening already existing roads in order to accommodate farm equipment and other vehicles.

"We want to be able to sustain that load along with regular traffic coming through," she said.

After Monday's open house, WORPO will finish its draft for its long-range transportation plan, which will then be posted on the Lima Allen County Regional Planning Commission's website, <https://bit.ly/3XWvR8x> to allow for public view and comment. Barry anticipates the draft to be completed sometime in November.

West Central Ohio Rural Transportation Planning Organization (WORPO)

Long Range Transportation Plan (LRTP) Public Open House

Where: ODOT District 1 Offices - 1885 N. McCullough Street, Lima

When: Monday, September 30th from 1 PM to 4 PM

WORPO is designated as an Ohio Regional Transportation Planning Organization (RTPO) for the seven counties surrounding the Lima-Allen County metropolitan area, including Auglaize, Hancock, Hardin, Mercer, Putnam, Van Wert, and Wyandot counties. WORPO is in the process of developing the region's first LRTP. The plan identifies multimodal and intermodal transportation policies and facilities needed to meet the RTPO's travel demand for a minimum twenty-year horizon. Please attend to share your thoughts about the LRTP!

The West Central Ohio Regional Transportation Organization is holding a Public Open House on Monday, September 30th. It will run from 1:00pm until 4:00pm (all afternoon) at the Ohio Department of Transportation District 1 Office located at 1885 North McCullough Street in Lima.

The purpose of the open house is to provide the public with information regarding upcoming proposed transportation projects throughout the regions of Auglaize, Hancock, Hardin, Mercer, Putnam, Van Wert, and Wyandot Counties.

There will also be time to ask questions and provide input concerning various entities such as ODOT, The Lima/Allen County Regional Planning Commission, and regional representatives of the 7-county area that makes up The West Central Ohio Regional Transportation Organization.

Open house covers long-range transportation plan

By [Lima News](#) - September 5, 2024

LIMA — The West Central Ohio Rural Transportation Planning Organization is holding a public open house from 1 to 4 p.m. Monday, Sept. 30 at the Ohio Department of Transportation District 1 office, 1885 N. McCullough St., Lima.

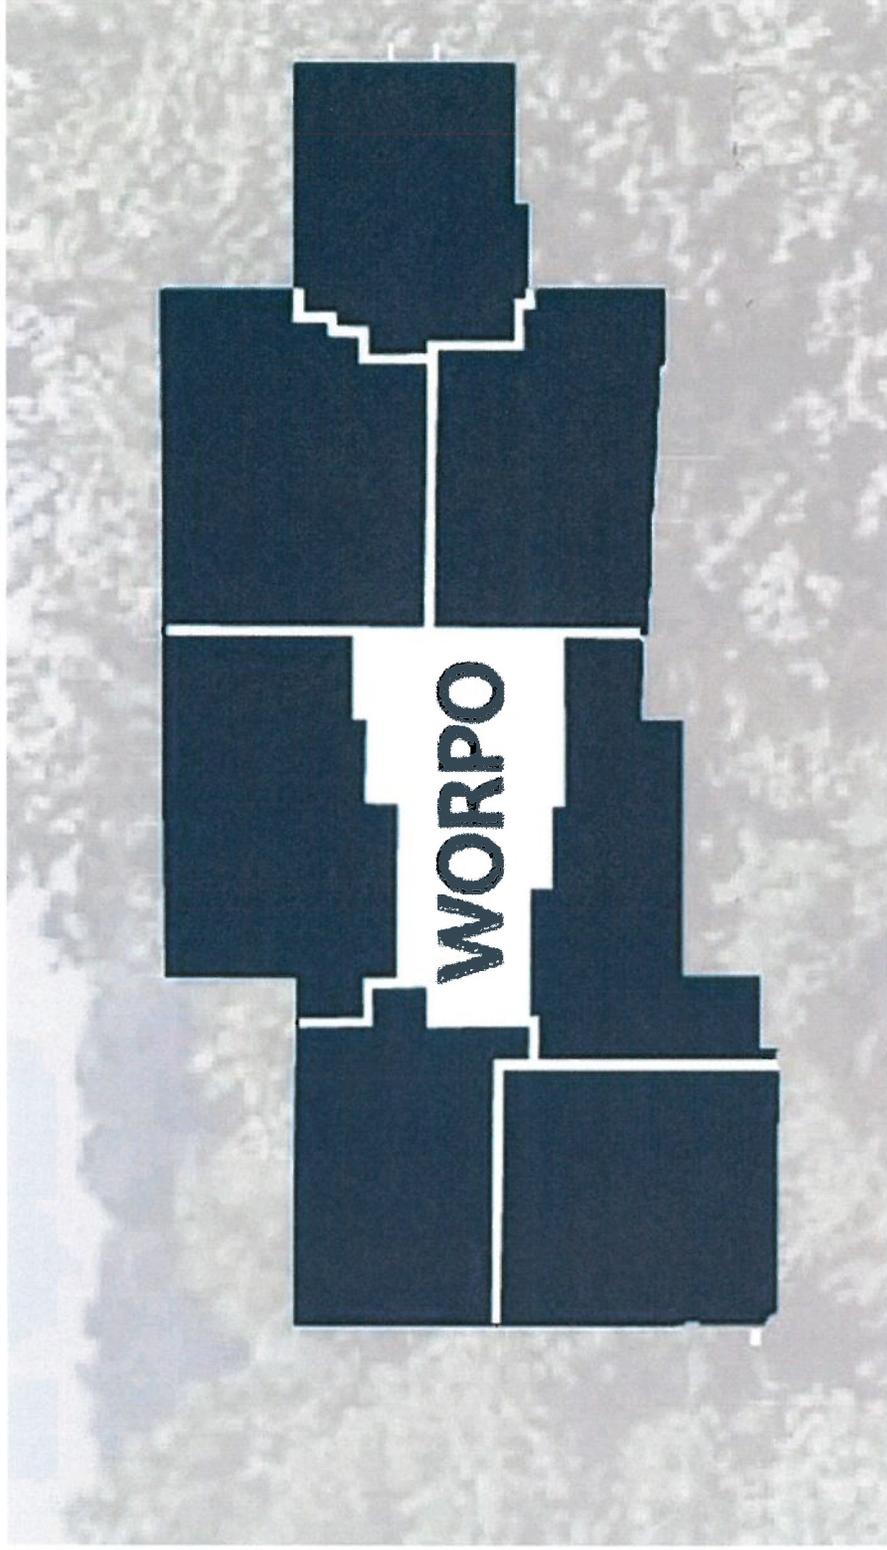

The open house will allow members of the public to learn more about the organization's Long Range Transportation Plan encompassing Allen, Auglaize, Hardin, Mercer, Putnam, Van Wert and Wyandot counties. The plan is centered on meeting anticipated transportation needs in the region over the next 20 years.

West Central Ohio Regional Planning Organization (WORPO)

LONG RANGE TRANSPORTATION PLAN

PUBLIC OPEN HOUSE

Benefits of RTPOs to Rural Regions

- 1 Instill a systematic transportation planning process.
- 2 Involve local officials in Policy Committee decisionmaking.
- 3 Provide a means to establish transportation goals, objectives, and regionally unique priorities.
- 4 Improve the ability of prioritized projects to compete for funding.
- 5 Facilitate conversation and public involvement between local communities and the State DOT.

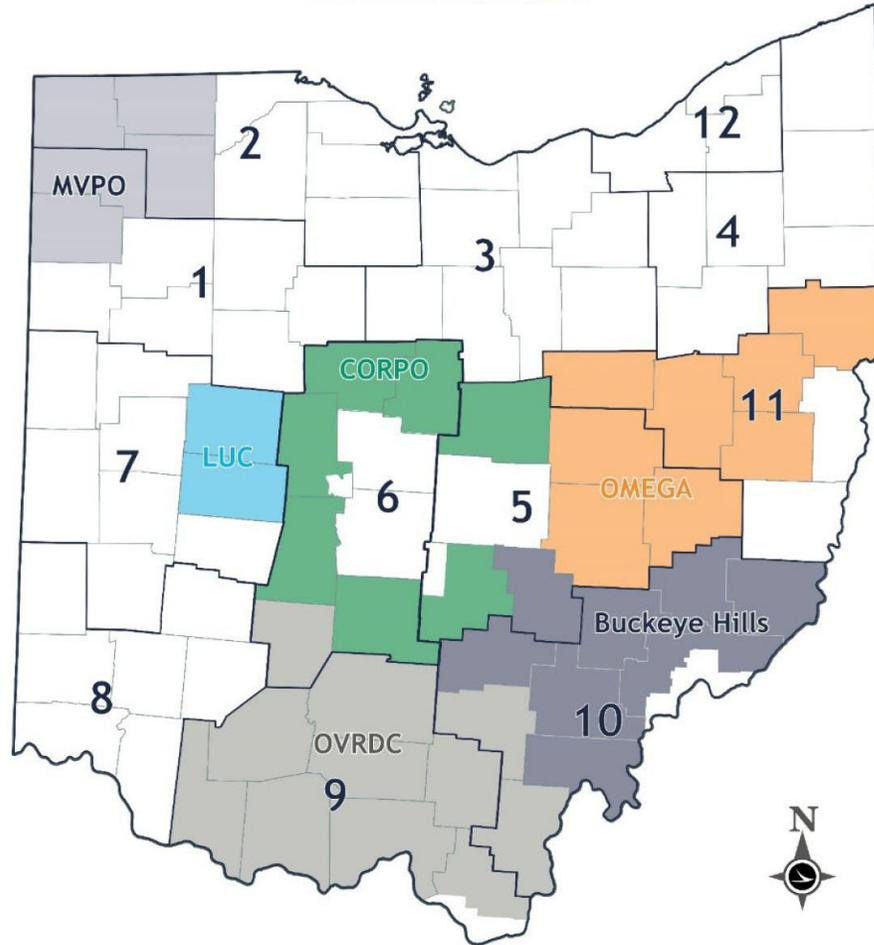

What is a Regional Transportation Planning Organization (RTPO)?

An organization that identifies local transportation needs, conducts planning, assists local governments, and supports the statewide transportation planning process in nonmetropolitan regions of a State

Signed into law in 2012 (MAP-21)

Ohio RTPO Boundaries

Ohio RTPOs

6 RTPOs in State

- Buckeye Hills Regional Council (Buckeye Hills)
- Central Ohio Rural Planning Organization (CORPO)
- Logan-Union-Champaign Regional Planning Commission (LUC)
- Ohio Mid-Eastern Governments Association (OMEGA)
- Ohio Valley Regional Development Commission (OVRDC)
- Maumee Valley Planning Organization (MVPO)

CORPO - around Columbus is most recent

RTPO Roles & Responsibilities

Public Involvement

- Critical to planning efforts
- Create public involvement process

Transportation Equity

- Ensure Title VI and Environmental Justice in all planning

Long Range Transportation Plan

- Guides regional investment in transportation

RTPO Roles & Responsibilities

Transportation Improvement Plan

- Created every 4 years
- Reflects investment priorities

Annual RTPO Work Program

- Must detail planning activities over next year, indicating who will perform work, project schedule, and products produced

Technical Assistance

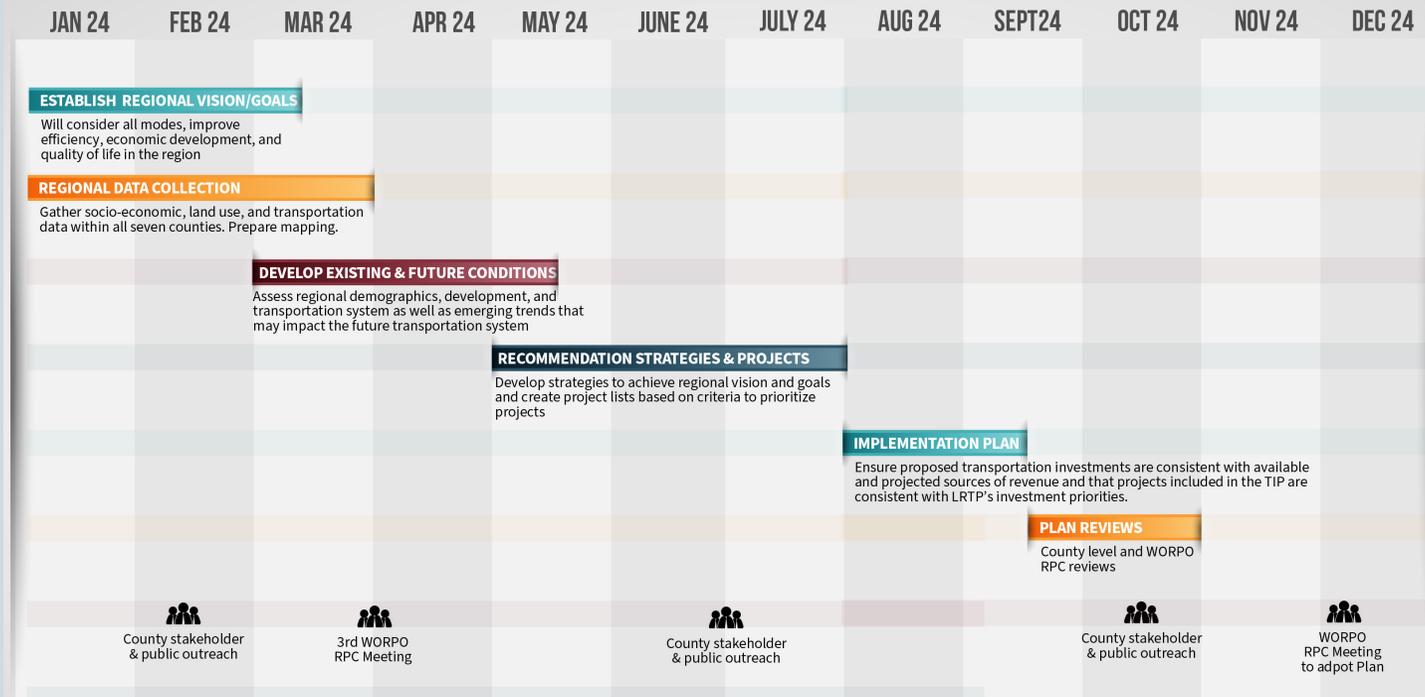

- WORPO staff can assist local/regional entities with transportation issues

Participation in Statewide Activities

- Assisting ODOT through statewide transportation planning process

LONG RANGE TRANSPORTATION PLAN SCHEDULE

WORPO

12-month process

Goal is to have approved plan by Dec 2024

Rounds of stakeholder/public engagement

Approved plan by Dec 2024 = RTPO funding allocated in July 2025

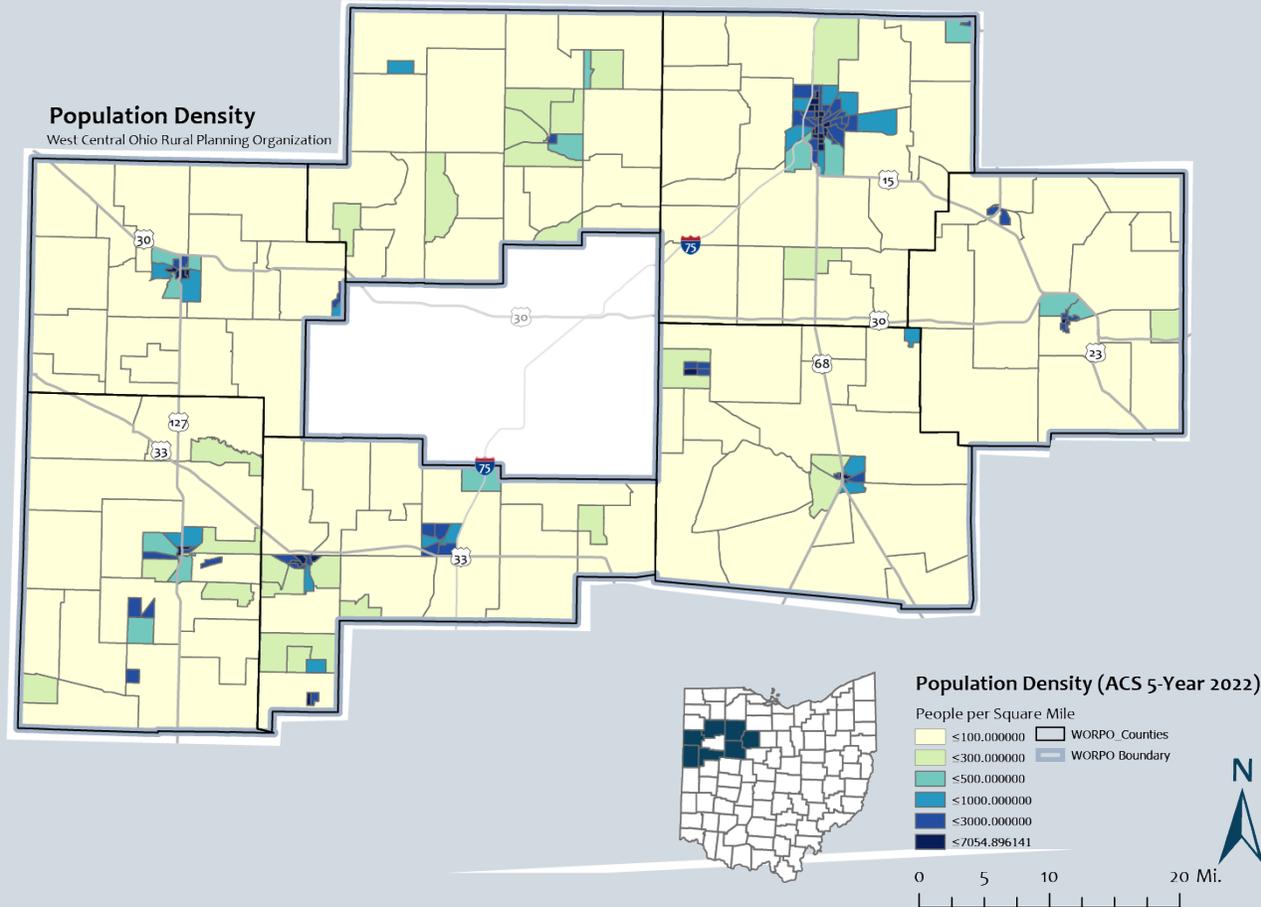

Chapter 1 - Goals & Objectives

Regional Goals & Objectives will populate Chapter 1 of the LRTP

6 Goals, each with multiple objectives

1. Improve **Safety** for all users
2. Maintain the existing transportation network in a **State of Good Repair**
3. Enhance the transportation system to be **Environmentally Sustainable and Resilient** to natural disasters.
4. Expand **Access** to the transportation network for all users
5. Strengthen **Economic Competitiveness** through improvements to the transportation network
6. Increase **Collaboration** between partners throughout the region

Chapter 2 – Regional Trends

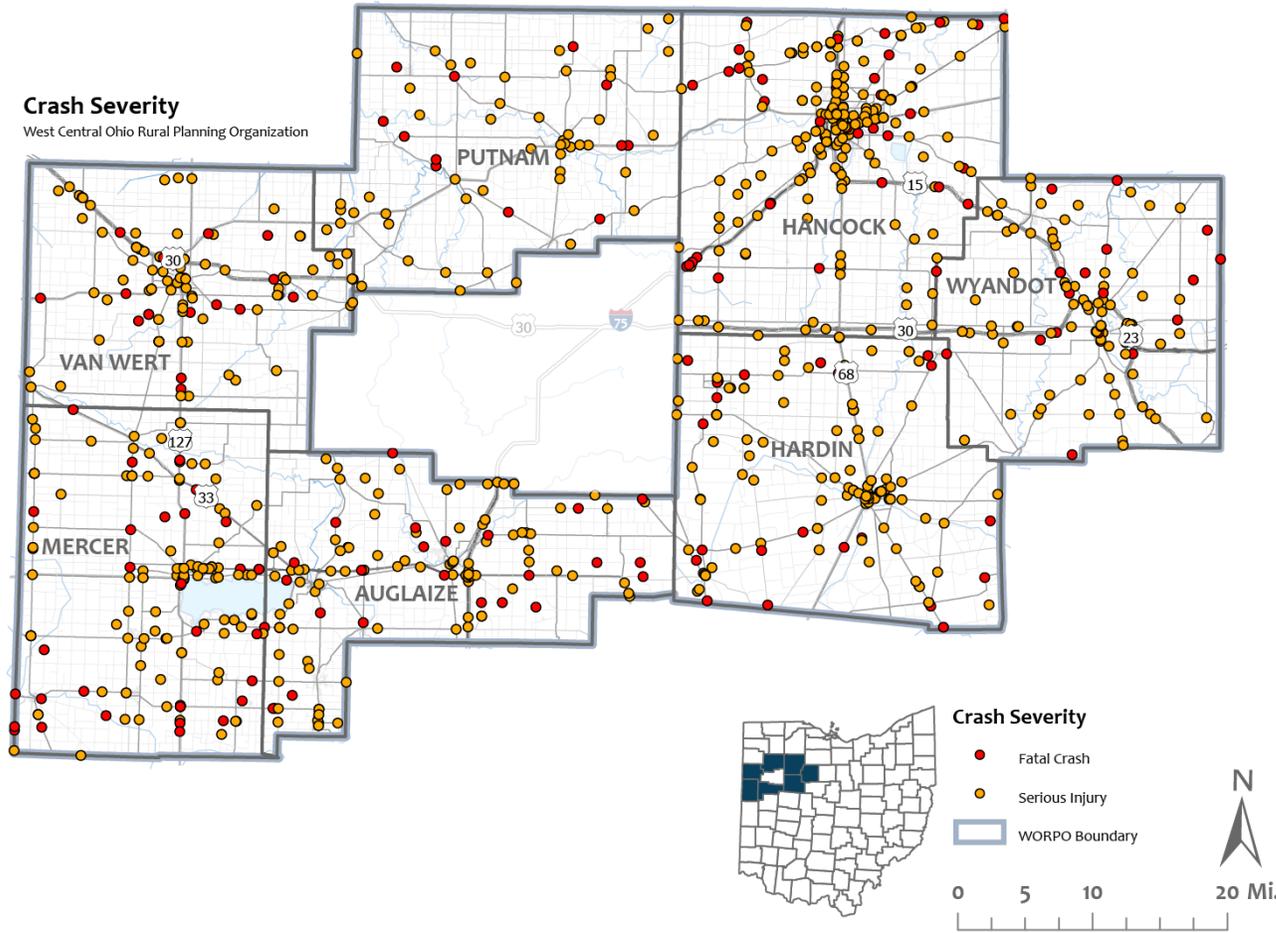

Focuses on

- Regional Background & Context
- Demographic Data (Population, Housing, Income, Employment)
- Commute Patterns
- Economic Data (industry clusters, jobs)
- Existing Land Use & Development

Chapter 3 – Existing Transportation System

Crash Severity

West Central Ohio Rural Planning Organization

Focuses on

- Assessing all modes within the regional transportation system
- Highways/Roadways (PCR, AADT, Crashes, etc.)
- Bridges (Condition Ratings)
- Bicycle/Pedestrian
- Transit (Fixed Route Service)
- Airports
- Freight and Intermodal
- Rail
- Amish Areas

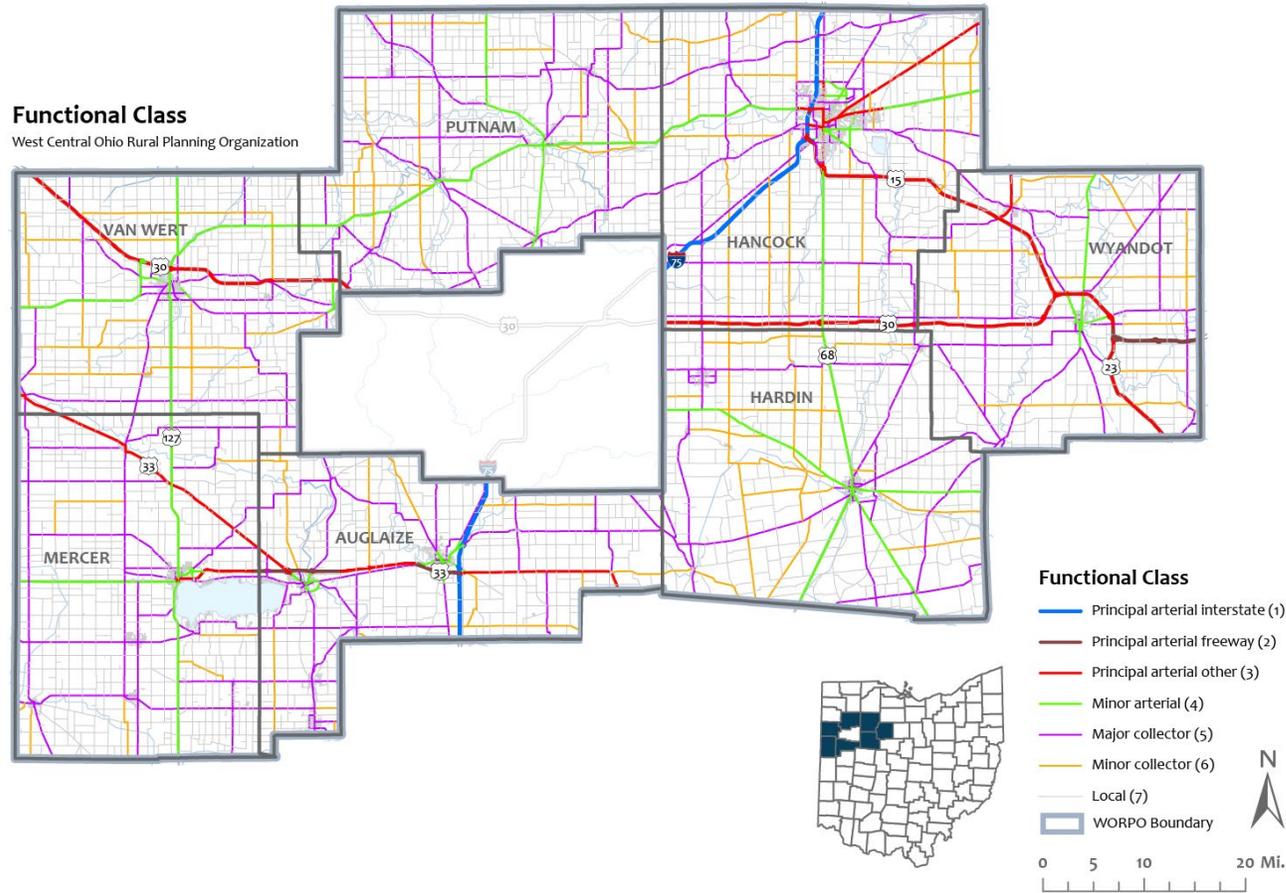

Chapter 4 – Future Conditions & Trends

Focuses on

- Projected changes in the region by 2050
- Future Demographics & Land Use
- Economic Development Projects
- Impacts to the Transportation System

Functional Class

West Central Ohio Rural Planning Organization

Chapter 5 - Project Lists

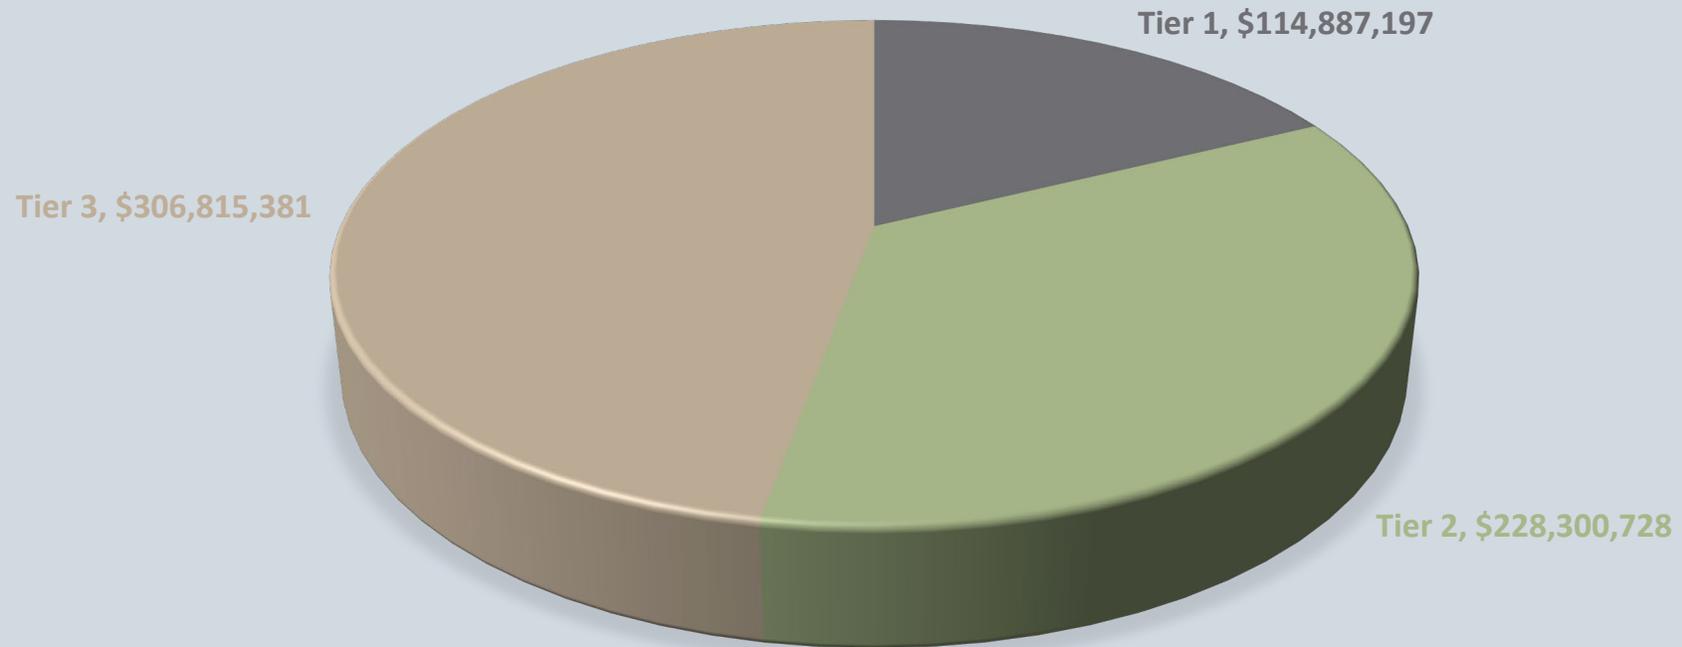

Projects divided into Tiers to inform TIP

- Tier 1
 - on the current Statewide Transportation Improvement Plan (STIP);
 - fully funded;
 - anticipated to complete before 2028;
 - or is a priority project expressed by the Rural Planning Committee
- Tier 2
 - partly or not funded;
 - anticipated to be complete between 2029 and 2034
- Tier 3
 - not funded;
 - anticipated to be complete on or after 2034

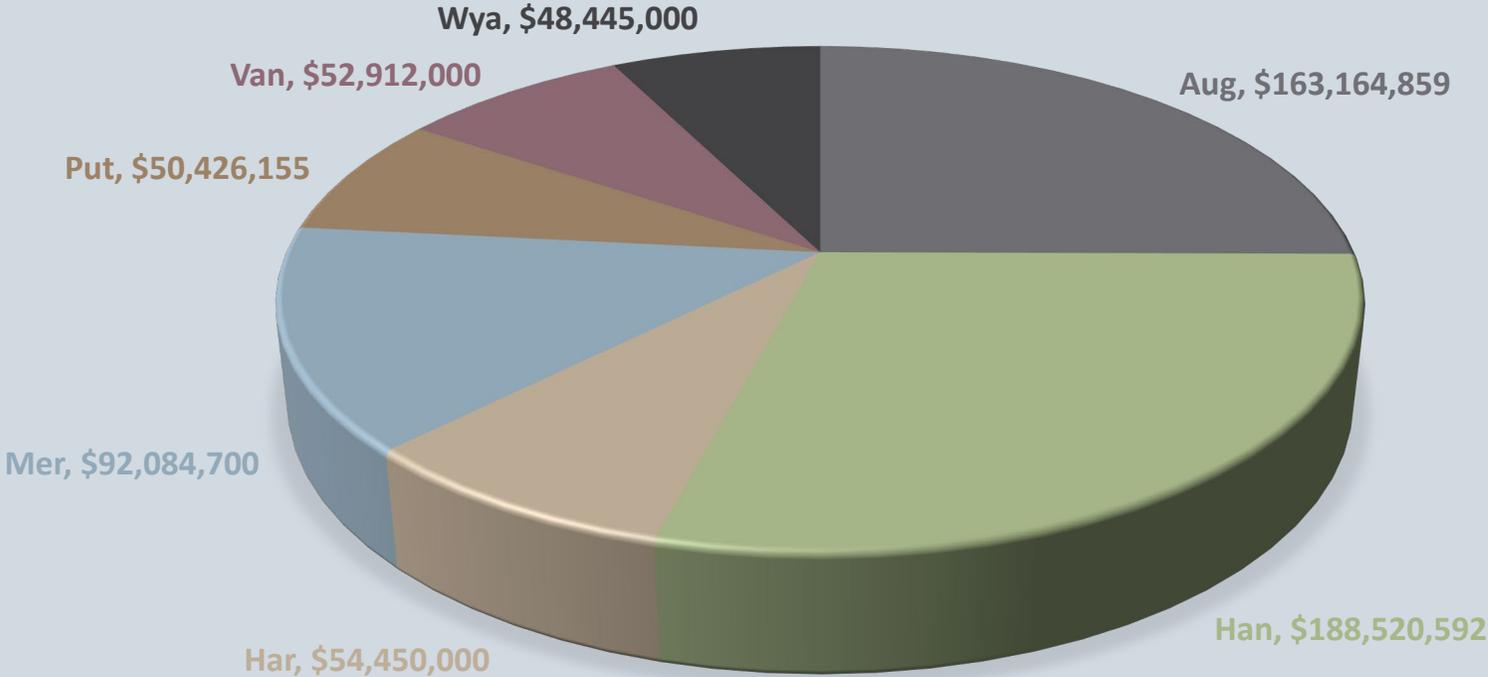

Projects will be segregated into Maintenance/Operations and Expansion/Safety in plan

Only expansion and safety projects will be mapped in LRTP

Q1

For specific comments, please provide a page number and your comment below.

Page Number:

6

Comment:

The "environmentally sustainable" goal should list prioritizing active transportation and public transit, and reducing personal vehicle miles traveled. The "expand access" goal should include overcoming the effects that previous transportation policies have had on vulnerable population groups.

Q2

For specific comments, please provide a page number and your comment below.

Page Number:

65

Comment:

Vision Industrial and the Mega Site in Van Wert both need updated due to recent developments. The figures shown are ~2 years out of date.

Q3

For specific comments, please provide a page number and your comment below.

Page Number:

74

Comment:

The widening of Washington St through Van Wert was included in the Feasibility Study without any public comment, though other facets of the Feasibility Study received several rounds of public comment. The Feasibility Study also shows that the proposed widening does not improve safety or congestion, despite the claims to the contrary.

Q4

For specific comments, please provide a page number and your comment below.

Page Number: 78

Comment: **Safety - recommendations should include promoting context-appropriate road design so that urban streets are narrow and geared toward access by slowing travel speeds, and rural highways are wide and geared toward travel efficiency by reducing access points. Environmental - recommendation should promote transit and other policies to reduce personal VMT. Access - recommendations should include educating the public on the effects of previous transportation policies and cut and clear construction methods that destroyed low-income neighborhoods. See ODOT's LTAP training for guidance.**

Q5

For specific comments, please provide a page number and your comment below.

Page Number: 91

Comment: **Remove the widening of Washington St in Van Wert from the recommended projects list - ODOT's Feasibility Study reports that neither congestion nor safety will be improved. Instead, a study is needed to resolve North-South traffic through Van Wert on Washington St, which is one of the worst LOS in the RPO area.**

Q6

Please write in any general comments you may have regarding the Goals & Objectives Chapter of the Long-Range Transportation Plan document.

Since this study will be in place for 25 years, the photos used should preferably be 5 years old or less (unless historical). Somewhere in the study, it should be acknowledged that widening does not alleviate congestion - especially in urban environments - and creates less safe environments.

Q7

Please add your name, email address, and where you reside (City, Village, or Township)

Name **Hall Block**

Email **hall.s.block@gmail.com**

City, Village, or Township where you reside **Van Wert**

Appendix B | Maintenance Project Lists

Tier	Project ID	Project County	Project Name	Project Sponsor	Fiscal Year Begin	Fiscal Year End	Project Description (1 to 2 sentences max)	Project Location	Column1	Project Type (revised by Consultant)	Project Cost (revised by

Putnam County

							Project will widen 1.9 miles of T.R. 19 by 1.5-feet on each side with asphalt pavement. The current pavement width is 17-18 feet. The sections to the north and south of this section are both 20-foot wide. The narrow road has a high traffic volume with many dump trucks that use this route to go to the Rimer quarry, and passenger vehicles that typically drive too fast for the width. Meeting oncoming vehicles is difficult and usually requires moving over to the stone berm. This causes potholes in the berm requiring constant repair. The widening will make a much safer corridor for vehicles, bicyclists, and pedestrians.
